

	PREMIUM	GOLD	PLATINUM	
<b>THE INITIAL EXAMINATION</b>	<b>General preventive check-up with a general practitioner or internist</b>	Once a year	Once a year	Once a year
	Check of tetanus and measles antibody levels	●	●	●
	Genetics of thrombophilic mutations (Factor V Leiden, FII-prothrombin (G20210A) and MTHFR, C677T, A1298C)	●	●	●
	Determination of blood type	●	●	●
	Check of hepatitis A+B antibody levels	●	●	●
	Monitoring of passive protection against tick-borne encephalitis	●	●	●
<b>EXPANDED LABORATORY TESTS</b>	Blood count + leukocyte differential count	●	●	●
	Sedimentation	●	●	●
	CRP	●	●	●
	Glycaemia	●	●	●
	Lipids: total cholesterol and its fractions LDL, HDL, triacylglycerols	●	●	●
	Liver enzymes: bilirubin, ALT, AST, GMT, ALP + amylase	●	●	●
	Biochemistry: urea, creatinine, uric acid, total protein, albumin	●	●	●
	Minerals: Na, K, CL, Mg,Fe including ferritin	●	●	●
	Thyroid hormones: TSH, Free T4	●	●	●
	Vitamin D	●	●	●
	Blood test for prostate cancer (PSA, Free PSA) for men over the age of 40	●	●	●
	Laboratory urine test: chemically, sediment	●	●	●
	Stool examination for the presence of occult bleeding to detect colon cancer in persons over the age of 40	●	●	●
	Cytological examination (gynaecology)	●	●	●
	Cytological examination in a liquid medium, i.e. LBC cytology instead of conventional cytology - higher sensitivity of the test + the possibility of screening for the presence of HPV	●	●	●
	Screening for the most common variants of BRCA mutations *	●	●	●
	Serum protein electrophoresis	●	●	●
	For clients over the age of 60 as part of laboratory testing - testosterone + SHBG (urology)	●	●	●
	Vitamin B12	●	●	●
	Folic acid	●	●	●
	Basic HPV test (gynaecology)*	●	●	●
	Anti-Müllerian Hormone (AMH) test for women over the age of 30 who are planning to become pregnant	●	●	●
	Test for cancer markers Ca 125, HE4, CEA, Ca 15-3 (gynaecology)*	●	●	●
	Cancer markers: CEA, CA 125, CA 19-9, CA 15-3, AFP, CA 72-4*	●	●	●

\*Laboratory test performed only on the basis of a doctor's recommendation.
